FEATURE ICONS

ASTM SAFETY FEATURES

ASTM International is one of the largest voluntary standards developing organizations in the world. ASTM standards are voluntary; however, they were federally recognized with the 1995 passage of the National Technology Transfer and Advancement Act (Public Law 104-113), which requires government agencies use privately developed standards whenever possible.

NFPA FIREFIGHTING FEATURES

The National Fire Prevention Association (NFPA) is a global, non-profit organization that promotes safety standards, education, training, and advocacy on fire and electrical-related hazards. Established in 1896 to standardize the use of fire sprinkler systems, the NFPA's scope grew to include building design, rescue response, electrical codes, and other safety concerns.

The boots bearing the NFPA icon have been certified as NFPA Compliant Footwear. This footwear is certified by a private, third party certification organization to meet at the time of manufacturing the design and performance requirements of the valid NFPA standards: 1970, 1971, 1977, 1992, and 1999.

Safety Equipment Institute (SEI) has served as one of the world's leading independent third-party certification program providers. An affiliate of ASTM International, SEI works with government agencies, standards development organizations, governing bodies, and manufacturers to accomplish one common goal to provide certified, trusted safety equipment. NFPA testing is audited & certified by the Safety Equipment Institute.

CERTIFICATIONS & COMPLIANCES

The US Department of Defense is required (with limited exceptions) under the Berry Amendment to procure only footwear produced in the United States using American-made materials and components. All Rocky Berry Compliant products are manufactured in the US using only American-made materials and components.

The boots bearing the 670-1 symbol meet the uniform standards of Army Regulation and Department of the Army Pamphlet 670-1. Boots in compliance with AR/DA PAM 670-1 are approved for wear with the OCP, ACU and UCP ACU uniforms.

The boots bearing the DAFI symbol meet the uniform standards of DAFI 36-2903, Dress and Personal Appearance of United States Air Force Personnel.

The boots bearing this symbol are designated as Safe to Fly by the United States Air Force as per Memorandum dated 21 Jan 23.

Passed by the 96th U.S. Congress in 1979, the TAA is a piece of legislation approving and implementing multiple trade agreements previously enacted and negotiated between the U.S. and other countries under the Trade Act of 1974.
